

Italy - Software

Well on track to meet medium/long term targets

4th February, 2016

PRELIMINARY FY-15 RESULTS

RIC: PITE.MI BBG: PITE IM Piteco, the undisputed domestic leader in the treasury management software niche, reported solid preliminary FY-15 results, in line with our forecasts. 599 clients as of Dec-15 and 5 new names just in Jan-16, lend weight to group strategy. Upside to PT faded, rating cut to Neutral. A few positive triggers not factored in CFO model.

Rating:

Neutral (Buy)

FY-15 net sales up 11% YoY, in line with CFO estimates

Revenues increased 11% to € 12.8m driven by high margin turnover linked to recurring maintenance & services fees (usually some 50% of total) and software sales. Total sales totaled € 13.40m, slightly higher than our € 13.20m projection. Piteco's focus on the niche of the treasury management software solutions is set to continue to ensure the group outperforms its core market. In the coming years, the growth of the top line is almost entirely seen driven by volume expansion, translating into a top line CAGR_{14-17e} of 9.9%.

NFP almost zeroed

Net financial position decreased to € 0.90m, from € 8.7m in H1-15, broadly in line with CFO expectation, and it compares with € 10.0m of dec-14. Taking into consideration the net IPO inflow of € 8.0m, the extraordinary costs linked to the IPO and the € 1.1m acquisition outlay for Centrodata, the company generated some € 4m Free Cash Flow in FY-15.

30 new clients in FY-15, booming January 2016 with 5 new names

Consistently with last years' average growth pace, there were 30 new clients in 2015, totaling 599 as of Dec-15, in line with our expectations. In Jan-16 Piteco added 5 new names, twice the usual rate, with allegedly mid-large entry tickets, which lends weight on FY-16e projections.

Upside to PT faded: rating downgraded to Neutral (Buy), PT € 4.00/s (€ 3.90/s)

Piteco momentum is seen to remain positive in the months to come. Preliminary FY-15 figures corroborates the investment case. Shares proved to a certain extent to be resilient to market turmoil, stably outperforming the Milan AIM. Shares grew 10.8% in 6M, 12.1% since IPO: upside to PT faded. Updated DCF valuation criteria move PT to € 4.00/s (€ 3.90/s), with 8.1% upside to current price. We downgrade the stock to Neutral (Buy). However, we highlight that Piteco might concretize in the coming months a move/a couple of moves aimed at bringing new products to the current selling proposition and/or companies with an accretive client portfolio, enhancing cross-selling. In addition, the adoption of the Patent Box tax scheme, still under assessment by Piteco, might sustain solidly bottom line. These two triggers are not factored into our model, as well as the boost stemming from the penetration into the US market.

CFO SIM wishes to provide ongoing coverage of the stocks mentioned in this document, with a frequency depending on circumstances considered to be important (corporate events and changes of recommendation, etc.). CFO SIM acts as a Specialist for Piteco stock, listed on the Milan AIM. The next table shows the ratings issued on the stock in the last 12 months.

DATE	TARGET PRICE	RATING
04/02/16	€ 4.00	NEUTRAL
30/09/15	€ 3.90	BUY

This document is distributed via electronic mail and fax as from the date indicated in the document itself and addressed to some 500 Italian and non-Italian professional investors. The document is available in electronic format at CFO SIM's Internet site, to Italian and non-Italian institutional investors, and/or in Borsa Italiana's Internet site.

RATING SYSTEM

- a BUY rating is assigned if the target price is at least 15% higher than the market price;
 - a **SELL** rating is assigned if the target price is at least 15% lower than the market price;
- a **NEUTRAL** rating is assigned if the difference between the current price and target price lies within the +/ -15% bands identified using the preceding criteria.

The rating is determined on the basis of the **expected absolute return 12 months forward** and not on the basis of the estimated out/underperformance relative to a market index. Thus, the rating can be directly linked with the estimated percentage difference between current price and target price. The prices of the financial securities mentioned in the report (also used for the calculation of market capitalisation and market multiples) are the reference prices of the stock market trading day preceding the publication date of the report, otherwise stated.
